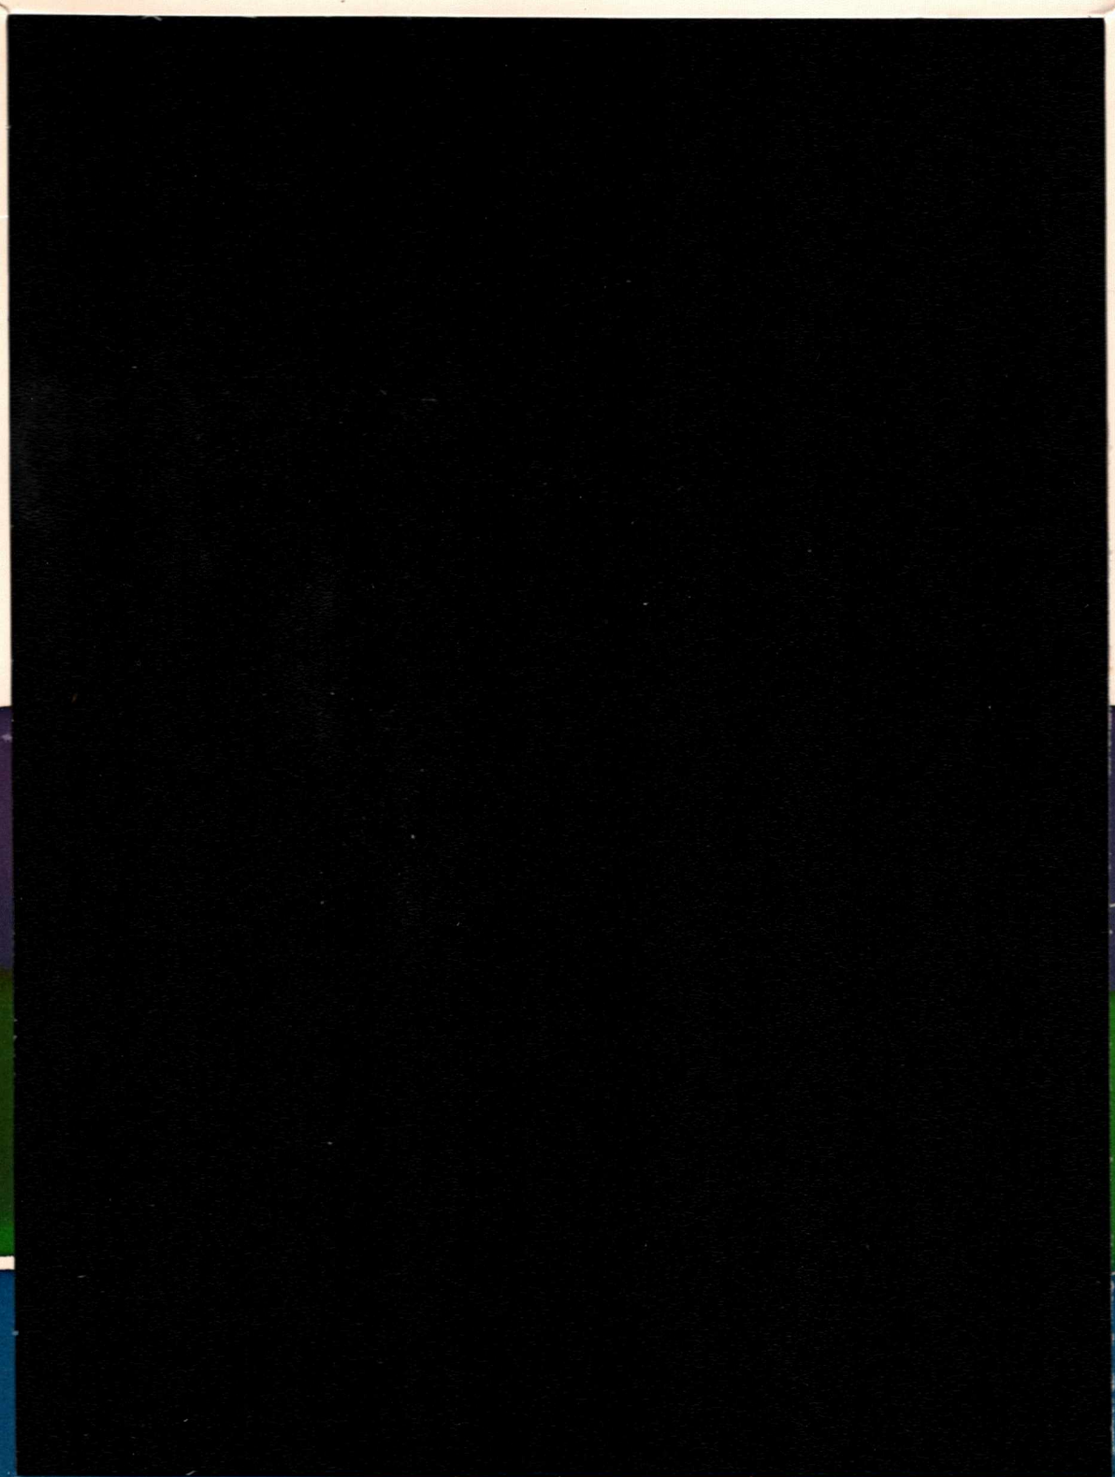
jane™ THE EASIEST WAY TO USE A COMPUTER



jane THE EASIEST WAY TO USE A COMPUTER

The most remarkable software programs ever developed for your word processing, spreadsheet and filing needs. By selecting from an assortment of easy-to-understand pictures at the top of each screen, Jane eliminates the need to become familiar with complicated computer commands. Use a joystick, mouse or keyboard to move around the screen quickly and easily. Makes using your computer easier than ever—even if you have never used one before!

Simply select one of the functions available in the Jane system and the pictures do the rest.

janewrite™

The word processor that allows you to type letters, reports or memos with amazing ease. Control type size, page format and more. The way that text appears on the screen is the way it will be printed. No surprises!

janecalc™

The calculator/spreadsheet that makes working with numbers a snap. Make simple calculations. Design your own worksheet or use one of the 2 worksheet templates provided for you. You can even "paste" data from Janecalc into a report written with Janewrite.

janelist™

Compile and store lists of information for future use. Includes formats for 8 different types of files, including your family's health records, personal address book and even a business mailing list. You can even design your own custom files. Janelist instantly makes available the information that's important to you.
